

Revenue

Major part of all information comes by means of:

- Collecting property tax
- Issuing bonds/borrowing
- Managing real estate/development - mostly not function
- Collecting usage charges and service fees for the services it provides

Property tax (PT) is one of the main sources of revenue for a local PT is levied on individuals or companies having some land, buildings and permanent improvements. Local agencies discuss other elements of a local government's revenue. Based on the 10.0% assumption, the revenues are expected to pay for the:

Other Property Tax information System is a web-based system that helps contractors the complete property tax operations of the various departments. The system supports all data at the point of creation that concerning the property and
